## DC INPUT, FIXED RANGE ISOLATED TRANSMITTER

### FEATURES

- Provides a Fully Isolated DC Output Proportional to DC Input
- 50 mV or 1 mA Minimum Input Span
- Unlimited\* Choice of Input/ Output Ranges
- Choice of Power Options
- 10 Year Warranty

### DESCRIPTION

The MM4300 provides a DC output, fully isolated from input, line power and ground, proportional to a DC input. It is useful in eliminating ground loops and common mode signals.

All Wilkerson products are designed with RFI filters and lightning protection to reduce susceptibility to electrical noise and damage by lightning.

It utilizes pulse width modulation to develop a pulse train with a duty cycle proportional to the input signal amplitude. This pulse train is coupled through a pulse transformer where the duty cycle data is converted to a proportional DC level in the output circuits.

### TYPICAL APPLICATIONS

Eliminates ground loops and large common mode signals. Use for large common voltage / current scaling and conversion with isolation for buffering and noise reduction.
