

DC Power Surge Protector

DS210..DC

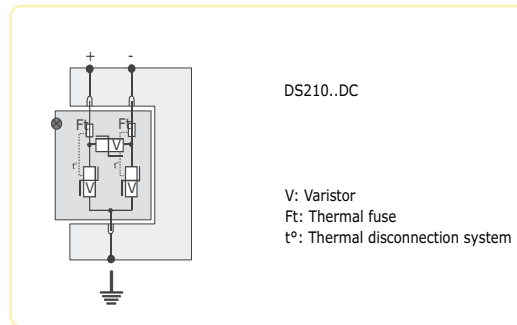

DS210.DC is a DC Surge Protection Device (SPD) for remote, off grid DC power applications. The DS210.DC provides protection against the direct and indirect effects of lightning.

The DS210.DC is a dual pole module protecting both positive and negative to ground and is available for DC power system voltages of 12, 24, 48, 75, 95, 110 and 130 Vdc. It is installed in-line or parallel with the power system and is mounted on a din rail for application directly next to the charge controller or power supply.

The DS210.DC incorporates a proven Metal Oxide Varistor (MOV) protection circuit and specific DC thermal fuses that allow robust surge current handling up to 6kA 8/20us and reliable DC disconnection. These units have visual fault indicators and replaceable protection modules.
