Dimensions and Diagram (in mm)

DS40 is a general duty AC Surge Protection Device (SPD) for high risk electrical service entrance and branch panel applications. The DS40 provides protection against the direct and indirect effects of lightning and is particularly useful in areas where space is limited.

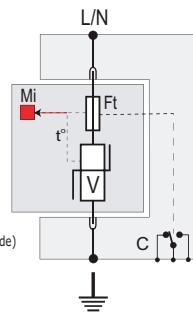

The DS40 is a multi-pole monoblock that can be configured for both common and differential mode protection in any single and three phase application to 480Vac.

The DS40 has a high surge current handling 40kA 8/20us, a low residual voltage, and /G version has no leakage current to ground plus no follow current. The DS40 module is din rail mountable with cage terminal connectors for parallel wiring. The DS40 include integral thermal disconnection compliant to UL-60691, a visual fault indicator, replaceable modules as well as remote signalization.

V: High-energy varistor
Ft: Thermal fuse
C: Remote signaling contact
t^o: Thermal disconnection system
Mi : Disconnection indicator
